27th February 1956]

THE HON. SRI R. SHANMUGA RAJESWARA SETHUPATHI: Restriction is being enforced on the use of electric energy during the evening peak load period between 6 p.m. and 10 p.m. daily only in respect of industries availing of L.T. Power. The general over-all power position in the areas served by the Madras Electricity Grid still remains far from satisfactory. The extra generating capacity now available over and above that to meet the existing demand is only just adequate to meet the load commitments already made and the normal growth of existing loads. If the restriction is relaxed now, the demand will shoot up to the full capacity of the Grid and all further developments will have to stop. Therefore it will not be possible to remove the restriction in force till such time as there is an improvement in the power position by the completion and bringing into operation of the Madras III Plant extension scheme and the Periyar Hydro-Electric Project.
